

Software-Developer (m/w) (Fullstack)

We are Venture Capital FarmTech start-up and develop a novel sensor-oriented monitoring system for dairy farms. Our sensor system allows farmers to measure health conditions of cows on a daily basis and informs the farmers in case of anomalies.

We are looking for a fullstack software developer to design, develop and deploy Web frontend and backend in the domain of databases and pattern recognition.

What are your tasks?

You contribute to the development of our health monitoring system by creating the Web application of the monitoring system and maintaining API development. We are small, agile team where you get your responsibilities assigned in the early beginning.

What are our expectations?

- Experience with PHP (v7), SQL, Javascript, HTML5, version controlling system (git)
- Linux/Unix basic knowledge
- Experience with Unit-Testing
- Analytical and problem-oriented thinking
- Think accross boundaries while working in a team
- The usage of modern tools for software development and documentation as well as regular communication with your team is a common practice for you

What knowledge makes an additional plus?

- Experience with REST API design, database schema design and implementation of algorithms
- Experience in Amazon Web Services and PostgreSQL
- Experience in data handling, data mining and deep learning

What can we propose?

You are perfect candidate to start at our company if you prefer to work with real-world problems that have a high impact in everyday life. You will work independently on tasks while having a freedom by creating concepts and designing software. Moreover, we provide:

- Flexible, individual working hours
- Pleasant working atmosphere in old building (no big glass palaces with huge open space rooms)
- Flat hierarchies, room for creativity and your own area of responsibility
- Perspective to share a company success
- Free parking slots and Park Sanssouci is just outside the door!
- RE-Railway station „Park Sanssouci“ is in 5 minutes time by foot (<30 Minutes from train station Berlin Zoo)
- Free cold and hot drinks as well as regularly box with fresh vegetables and fruits
- Individual possibilities for further education
- Free sport courses from Uni Potsdam
- An interdisciplinary team with regular and relaxed communication flow
- Get-together events and collective team excursions

We are looking forward to meet you!
